

Extended ONS Product Reference Guide

This guide provides information on clinically and cost-effective ONS (green boxes) to prescribe within each product group and should be utilised when recommending the prescription of ONS in primary or secondary care. All prices are listed per serving and may vary dependent on pack size. **All figures may vary depending on flavour – the most common has been listed, however please check compendiums (please see key).**

NB. patients with specific dietary requirements should always cross-reference company guidance to ensure products are suitable

Red Amber Green (RAG) rating:

Green – If food-first trialled, consider short-term/acute prescription of first-line green product and refer to dietitian for review. Powdered products preferred.

Amber – Consider only if there is a clinical rationale or first-line green product trials were not tolerated

Red – Do not prescribe in primary care without a written request with clinical justification and regular review from a dietitian.

Please see the '[Retail ONS and High Energy & Protein Foods](#)' guide for cost-effective supplement ideas

Powdered ONS – always consider prescribing a powdered ONS first if appropriate*

Extended ONS Product Reference Guide

Compact style – if low volume clinically indicated

In South East London we discourage the routine use of compact supplements. Please consider a standard volume supplement which would also support hydration. Unless there is a clear clinical rationale for fluid-restriction, please choose non-compact style ONS.

Product Name	Price	Energy (kcal/serve)	Protein (g/serve)	CHO (g/serve)	Unit size	Na ⁺ (mmol)	K ⁺ (mmol)	PO4- (mmol)	Mg2+ (mmol)	Allergens	IDDSI Level	Osmolarity (mOsm/l)	Flavours Available

Extended ONS Product Reference Guide

Fibre-containing

High fibre products are considered $\geq 3\text{g}/100\text{kcal}$ or $\geq 6\text{g}/100\text{g}$. The products listed here are only a 'source of fibre', and not 'high fibre'. Therefore, please consider using high fibre foods as first-line management in place of ONS where possible (see below table for more info).

Product Name	Price	Energy (kcal/serve)	Protein (g/serve)	CHO (g/serve)	Unit size	Na ⁺ (mmol)	K ⁺ (mmol)	PO4- (mmol)	Mg2+ (mmol)	Allergens	IDDSI Level	Osmolarity (mOsm/l)	Flavours Available

Disease specific – initiated only under Dietitian review

The following supplements are available, however given limited evidence for their use in this disease group(s), they would not be recommended above nutritionally comparable products. The micro/ macronutrient profiles of these supplements may be better managed with a combination of cost-effective ONS and additional prescribable or OTC products. If you would like to prescribe one of these products, please discuss with the prescribing support team and provide a clear clinical rationale.
