

Reference Number	Title	Brief Description	Applicant	Organisation making application	Status	Date of DUC/ approval
2021-009	SEL CCG BI Team information to support system planning, commissioning and Population Health Management	Application for NHS South East London to access and use information held in the SEL data service (Discovery / LDS) to support system wide data needs in SEL, e.g. planning and population health for ICS, access to information for partners where approved	Nic Morris, Head of BI SEL ICB	SEL ICB	Approved	14/09/2021
2022-001	London regional data sharing Pathfinder project - asthma decision support dashboard	Application for ICS use of Asthma data for Adults and Children to develop a London Asthma Decision Support tool to link into health improvement initiatives.	Ingrid Wolfe, Director, Institute for Women and Children's Health, KHP and Irem Patel, Consultant, KCH	SEL ICB sponsored on behalf of the ICS and Clinical Leads	Approved	10/01/2022
2022-002	Guys and St Thomas's access to data to prioritise diabetic waiting times	Application to support hospital (GSTT) waiting list risk and prioritisation and future care delivery options.	Chris Spellman, GSTT Digital	GSTT	Approved	20/09/2022
2023-001	Migration of Lambeth DataNet to central South East London ICB platform and access to SEL level information	Application to support the continuation of Lambeth Datanet (an NHS and Local Authority collaboration) using new data sources and services. Lambeth DataNet (LDN) aims to support the health system in Lambeth	Warren Beresford, Digital Lead Lambeth Place	SEL ICB	Approved	16/01/2024
2024-002	MpRisk, one off data need for mental health care pathway analysis	Application to support the development of an integrated perinatal mental health care access pathway based on psychosocial risk screening.	Sandra Nwoeke	First 4 Health Group	Approved	15/07/2025

2025-001	SEL ICB Sickle Cell care Evaluation	Application to support ICB analysis of deidentified data to evaluate pilot sickle-cell programme	Danielle Harris	SEL ICB	Approved	08/07/2025
2025-003	SEL ICB Digital Health and Care Technology (DHACT) evaluation	Application to support SEL ICB and Royal Borough of Greenwich Public Health collaboration and linking data to compare the use of public health services between people who received a DHACT intervention.	Sam Bassett, Royal Borough of Greenwich	Royal Borough of Greenwich	Approved	16/12/2025
2026-001	SEL Integrator Hosts to support Population Health Management implementation e.g. Place and INTs.	Application for SEL Integrators to access the SE London Integrated Dataset using the new and approved GSTT hosted data service (Snowflake Data Service), for Population Health Management implementation.	Jack Barker, Rachael Smith, Elliott Ward, Chris Euden, Cormac Breen, Ingrid Wolfe	LGT, GSTT, KCH, Oxleas NHS Trusts	Approved	20/01/2026
2026-002	Acute Services Review - Sustainability Programme	Application to support ICS wide work assessing pressures on the hospital sector, population needs and service change opportunities. Carnall Farrar have been commissioned to support the above on behalf of the health partners.	Sandra Iskander, ICB Sustainability Lead	SEL ICB	Approved	17/02/2026
2026-006	OncoLlama AI support tool (IIAG OneLondon SDE application)	Application to explore the use of AI tools in Cancer Care. OncoLlama is an NHS-developed AI tool that reads clinical documents and automatically extracts detailed cancer information with >98.5% accuracy. Rather than relying on expensive and time-consuming manual curation, OncoLlama can turn millions of cancer records into comprehensive cancer datasets safely. Potential benefits to innovation and speed of treatment.	Dr. Joe Zhang, London AI Centre.	GSTT / University College London Hospitals (AI Centre for Value-Based Healthcare)	Approved	16/06/2026

2026-005	NHS Health Check study / research	Application for research study looking at the cost-effectiveness and equity impacts of NHS Health Checks in South East London, which may inform future care models and patient support.	Mikyung (Kelly) Seo and Yutong Jiang, Kings College London	Kings College London	Approved	16/06/2026
2026-011	Neighbourhood Impact Modelling, to support future community integrated care - PPL (IIAG OneLondon SDE application)	Application to support the London Neighbourhood Impact Model work, which will support Integrated Care Systems to test, plan and make informed decisions on the use of available resources in a new neighbourhood integrated care approach.	Adam Wall - PPL Consultants, on behalf of London ICBs	PPL on behalf of SEL ICB and the other three London ICBs	Approved	07/08/2026
2026-012	Obesity and weight management treatment evaluation study (IIAG OneLondon SDE application)	Application to support research into obesity and weight management treatments, which are a large scale population health challenge. Increasingly medications e.g. Glucagon-like peptide-1 (GLP-1) medications and injections, which have been used to support diabetic patients, are now being used to support weight loss. Demand and uptake for these drugs have surged recently. This study will help the NHS to understand the prevalence, impact, effectiveness, cost burdens, and equity of GLP-1 drugs.	Benjamin Pierce, Imperial College London	Imperial College Healthcare NHS Trust	Approved	07/08/2026
