

South East London Area Prescribing Committee

**Withdrawal of formulary recommendation number 002
(issued August 2013):
Degludec insulin 100 units/ml (Flextouch pen and penfill cartridges)
for diabetes**

This formulary recommendation has been withdrawn as it has been updated and re-issued following a formulary submission for use in paediatrics.

The new recommendation (059) for insulin degludec can be found [here](#) . The transfer of care document for insulin degludec can be found [here](#)

Please contact lamccg.medicinesoptimisation@nhs.net for further information.
