NHS

Key Performance Indicators to assign specific monitoring for SEL COVID-19 medicines for non-hospitalised patients and COVID-19 medicines for hospitalised patients

Up until April 2023, treatments for COVID-19 infection were under the remit of NHS England (NHSE). From April 2023 the commissioning responsibility a for all COVID-19 treatments was transferred from NHSE to Integrated Care Boards (ICBs). Previous key metrics collated by NHSE can be found in the legacy Commissioning Framework: COVID-19 Therapeutics for Non-Hospitalised Patients C1677-commissioning-framework-covid-19-therapeutics-for-non-hospitalised-patients-march-23.pdf.pdf (england.nhs.uk).

A revised service delivery model for COVID-19 treatments in South East London is under development. This monitoring framework outlines the parameters that will be measured in the interim until the service delivery model changes. The parameters focus on the use of medicines in line with existing guidance from NICE and legacy NHSE documents, as reflected in the SEL Joint Medicines Formulary.

Please note, reporting for first six-month period (H1 data) in 2023/2024 will cover COVID-19 medicines prescribed from 27th June onwards as data prior to this was submitted directly to NHSE during the national transitional period from NHSE to ICB.

SEL Medicines Value Group: June 2023
SEL Forum for antimicrobial stewardship: July and August 2023

Approval date: October 2023   **Review date:** April 2024 **(or sooner if evidence or practice changes)**

Key outcomes measures for non-hospitalised patients

KPI	Intervention	Standard	Measure and frequency	Data Source	Who measures	Frequency of reporting – in any financial year
1	Review number of patients receiving each COVID-19 treatment	*N/A – baseline data to assess proportions accessing each treatment option.*	Total number of patients receiving each COVID-19 treatment as a proportion of the total number of patients receiving COVID-19 treatments	Trust database	Trust	Six monthly: • First report to be presented at October SELFAS (H1 data) • Second report to be presented at April SELFAS (H2 data)
2	All patients to be considered for treatment in line with NICE Guideline (NG)191* recommendations and legacy commissioning policy whilst applicable *NG191 incorporates NICE Technology Appraisals published for COVID-19 treatments	All patients receive treatments in line with NICE recommendations and legacy commissioning policy whilst applicable 100% of patients audited should be receiving treatment in line with NG191 criteria or agreed local interim arrangements. Audit should also cover treatments not recommended by NICE.	a) Audit of patients treated in line with NG191 approved COVID-19 treatments. b) Audit of patients treated under agreed local interim arrangements (legacy commissioning policy) whilst applicable c) For patients not treated in line with NG191 or interim local arrangements – rationale for variance to be explored. Audits will cover all patients over the reporting period.	Trust database	Trust	Six monthly: • First report to be presented at October SELFAS (H1 data) • Second report to be presented at April SELFAS (H2 data)
3	Review number of patients receiving treatment who are registered with SEL GP vs non-SEL patients	*N/A – baseline data to assess proportions accessing treatment.*	Audit number of non-SEL patients prescribed treatments* *treatments provided by SEL CMDU based at Guy's Hospital only	IDEA (SEL CMDU patients only)	Guy's Hospital only	Six monthly: • First report to be presented at October SELFAS (H1 data) • Second report to be presented at April SELFAS (H2 data)
