

Lewisham Local Care Partnership: Clinical and Care Professional Lead

The Lewisham Health & Care Partnership is the Local Care Partnership (LCP) of the South East London Integrated Care System that came into effect on 1 July 2022. The members of the partnership include the SEL ICB, London Borough of Lewisham, Lewisham & Greenwich Trust, SLAM, primary care, the voluntary and community sector and our local population.

An exciting opportunity has arisen for a clinical or social care professional to join the Lewisham LCP as the Clinical and Care Professional Lead. Strong clinical and care leadership is crucial in any successful integrated system and with the creation of Integrated Care Systems there is a real opportunity to create deep and meaningful integration in how we plan and deliver care for our population, taking account of the wider determinants of health. You would develop and lead a group of clinical and care professionals to maximise these opportunities and make a real difference to lives of our local population.

This role will provide overall leadership to the Lewisham Local Care Partnership clinical and care professional network for acute, mental health, community, primary care and social care, and to the other Clinical & Care Professional Leads across the range of portfolio areas. S/He will be the Lewisham representative to the South East London Clinical & Care Professional Board.

The post will be a member of the Local Care Partnership board, and as a leader will bring their perspective to this group, informed by their expertise and experience as a clinical and care professional.

The role will be responsible for establishing and convening a network of local clinical and care professionals, and encouraging links to the wider South East London C&CP Collaborative for support, sharing learning and development opportunities.
